Makassar, Sulawesi Selatan

Mobile and Fullstack Developer specializing in Flutter and end-to-end application development. Experienced in leading the development of a startup product (MentorMe) from the concept phase to successfully securing national funding (P2MW & PKM). Possesses a strong academic background (3.81 GPA) with student exchange experience at ITB (Bandung Institute of Technology). Skilled in integrating Firebase backend, designing innovative UI/UX, and technical project management.

Education

Universitas Muslim Indonesia - Makassar

Sep 2022 - Present

Informatics Engineering Study Program

- GPA: 3.81/4.00
- Relevant Coursework: Data Structures, Algorithms and Programming I & II, Informatics Logic, System Analysis and Design, Data Communication
- Microsoft Certified Fundamentals (MCF) Certification

Institut Teknologi Bandung - Bandung

Feb 2024 - Jun 2024

Informatics - Indonesian Student Exchange Program (PMM) Batch 4

- Participated in a one-semester student exchange program at Institut Teknologi Bandung, completing 20 academic credits.
- Relevant Coursework: Object-Oriented Programming, Application Development on Specialized Platforms, Software Engineering.
- Served as a Creative Team Member managing content for the Instagram and TikTok accounts @pmm4_itb_salanesa.

Experience

Project Management & Quality Assurance Intern | PT Hadji Kalla

- Developed and standardized technical guidebooks for the Dealer Management System (DMS), focusing on Sales and Service modules.
- Translated complex system logic and technical workflows into structured operational documentation for end users.

Program Kreativitas Mahasiswa (PKM) - Makassar

Jun 2023 - Oct 2023

- Developed creative content strategies to increase audience engagement and maintain consistent messaging and branding across social media platforms for @prolaniscare.app.
- Managed activity schedules and resources, ensuring all programs were executed effectively and aligned with predefined objectives.
- Maintained and updated activity logbooks, documenting key events, progress, and operational details throughout program implementation.
- Provided health education, guidance, and practical support to individuals with Type 2 Diabetes Mellitus, helping them improve disease management and overall quality of life.

Pusat Pengembangan Riset Mahasiswa Universitas Muslim Indonesia - Makassar/Indonesia

Feb 2025

Kepala Departemen Penalaran

- Formulated and executed departmental strategies to increase student scientific publication output, organizing research discussion forums, journal review sessions, and intensive academic writing workshops.
- Led program coordination and timeline management for annual departmental initiatives, ensuring performance targets were achieved in developing students' critical thinking and research capabilities.
- Managed departmental resources and activity scheduling to improve operational efficiency and support the development and regeneration of high-quality members.

Project

Home Workers

- Present

Fullstack Android Developer

- Developed the front-end application for Home Workers, implementing responsive and user-centered interfaces.
- Implemented the backend services and APIs to manage application logic and system communication.
- Designed and structured the database system to ensure efficient data management and scalability.

MentorMe (Platform EdTech)

Sep 2024 - Present

Fullstack Android Developer

- Led a product development team that successfully secured P2MW 2025 funding, became a Wirausaha Merdeka finalist, and presented

the product at KMI Expo Magelang.

- Developed a cross-platform application ecosystem (mobile and web) using Flutter.
- Integrated Firebase APIs for real-time data synchronization and secure user authentication.
- Designed complex business logic architecture and built high-fidelity UI/UX prototypes to ensure efficient and intuitive user flows for mentors and trainees.
- Managed the full product development lifecycle, including database design, feature implementation, and product deployment for public demonstration (Demo Day).

Game Not A Nightmare

Mar 2024 - Apr 2024

Junior Front End Developer

- Implemented advanced gameplay mechanics in C# and built custom debugging features for dynamic adjustment of character parameters (speed and endurance), improving testing efficiency during the Quality Assurance process.

Bondoman Application

Mar 2024 - May 2024

Junior Front End Developer

- Developed financial transaction management modules and interactive statistical data visualizations to enable accurate monitoring of user cash flow.
- Optimized the front-end architecture to improve application performance and ensure smooth, responsive user interface transitions.

ProlanisCare.App

- Present

Fullstack Developer

- Published an Android-based diabetes health management application with Firebase integration to enable real-time patient data monitoring.

Skills, Awards, and Competitions

- **Achievements** (2025): Awardee – Program Pembinaan Mahasiswa Wirausaha (P2MW), Ministry of Education, Culture, Research, and Technology (2025)
- **Achievements** (2025): 2nd Runner-Up – Early Stage Category, Entrepreneurship Awards (2025)
- **Achievements** 🏅 (2024): Semifinalist, Injection Innovation Competition (2024)
- **Achievements** 🏅 (2023) : PKM Research Grant Awardee — Ministry of Education, Culture, Research, and Technology (Kemendikbudristek)
- **Achievements** 🏅 (2023): Silver Medal – Best Presentation (Health Scientific Paper Category), Neira Competition (2023)
